About			<p>Hello students and families! My name is Mrs. Young and I love teaching math, learning and laughing.</p> <p>This is my tenth year teaching in Foxboro and I couldn't be more excited about teaching in such a</p>

			<p>fabulous school system. I taught fourth grade at the Igo school for two years, then I was lucky enough to become the elementary math specialist, travelling between the three schools. This year I teach at the Igo full time.</p> <p>I graduated from Framingham State College with my bachelor's degree in Elementary Education and Psychology. I received my master's degree in Mathematics Education through Simmon's college.</p> <p>In the past, I have taught preschool and sixth grade as well. Teaching children of all ages is my passion! My expectations are high but I also love to have fun with my students! I think my students would agree that we work hard and laugh hard every day!</p>
